

PTP
ALLIANCE

OAKLANDS CROSSING GRADE SEPARATION

CAR PARKING FACT SHEET

The Oaklands Crossing Grade Separation Project will improve safety for all road users and ease traffic congestion by lowering the rail line under the road and removing the level crossing.

Parking prior to the project

The Oaklands Railway Station previously provided 300 formal car park bays, as well as two Kiss 'n' Go zones, for train commuter use.

An additional 50 car parks will be delivered on completion

Upon completion of the project, the PTP Alliance will provide more than 50 additional car parks. There will be a total of 360 formal car parks bays available.

Prior to construction starting, Crozier Terrace held the largest number of car parks. The new commuter car parks will be spread more evenly around the station, to help with the dispersion of vehicles and consequent traffic in the local

area. Future car parks will be within reasonable walking distance to the new Oaklands Station.

Please see map overleaf for details on car parking during and after the project.

Parking during the project

During construction, there will be fewer commuter car parks available, particularly along Crozier Terrace where the new station is being constructed. These car parks were removed in late May 2018.

To help offset the reduced availability of commuter car parks during construction, a temporary commuter car park is now open in the vacant land next to the Coles Warradale (on the corner of Morphett and Diagonal Roads). This car park will remain open for the duration of construction.

On-street car parking within Murray, Crozier and Railway terraces will also be temporarily closed, upgraded and

then reopened for commuter use from late 2018.

Where else can commuters park during construction?

Train commuters who usually use the Oaklands Railway Station car parks are urged to consider alternative options, as there will be fewer available spaces during construction.

Additionally, if commuters are within walking or cycling distance to the station and it is feasible, consider this form of transport to the station instead of driving and parking.

The Kiss n' Go on Murray Terrace will also remain open throughout the project.
